

IS YOUR PLANTER READY FOR SPRING?

2940 Air Adjust™ Row Cleaner

Up and down pressures can be adjusted from the cab to create the ideal ride for row cleaners.

PATENTED

2968 Fertilizer Opener

Consistent off-the-row fertilizer placement, with single or dual blades and either a spring-loaded knife or injection.

6200 Twister® Closing Wheel

Twisted spikes enhance seed-to-soil contact and help create the ideal seed environment. Fractures the sidewall in wet and unfavorable planting conditions.

PATENTED

Nutrient placement

Seed-to-soil contact

Drag Chain

Provides additional functionality to close the seed furrow.

NEW!

Poly Floater Wheel

Enclosed center design limits soil movement at higher planting speeds.

Clean seedbed

SharkTooth® Finger Wheel

Backward-sloping fingers designed to clear a path free of debris, improving planter ride and seed placement. PATENT PENDING

Spoke Planter Gauge Wheel

Open wheel design allows wet soil to move through without plugging the gauge wheel. Available in 3" and 4 1/2" widths.
